EXPERIENCE

FPT INFORMATION SYSTEM (FIS)

Oct 2024 - Oct 2025

Role: Full-stack developer

Department: FIS BANK

PROJECT

NEW WORKFLOW
Dec 2024 - Oct 2025

Client: Asia Commercial Bank - ACB

Description: Worked within the FIS BANK unit to develop a core workflow automation system for banking operations.

Key Responsibilities:

- Full-stack Implementation: Owned the end-to-end development (Database, API, Frontend) for three critical banking modules: Off-Balance Sheet (OBS), Endorsement, and Payment Amendments.
- Database Design: Architected database schemas specifically tailored for high-integrity banking transactions.
- API Development: Built and optimized APIs to handle complex business logic regarding financial instruments.
- Domain Application: Translated specific banking requirements (Banking Domain) into technical solutions, ensuring compliance with strict financial workflows.
